Bank of Georgia Investment Management

Private Banking & Wealth Management

Private Banking

Individual Bank Accounts

Multi-currency current account accruing interest in USD, EUR, GBP and Georgian Lari (GEL) represents a cornerstone of Bank of Georgia Private Banking Services. This account is bundled with VISA Infinite International www.visa.com/infinite/.

Bank of Georgia VISA Infinite

The OneCard You Need

Representing a single account with features of savings, current account, debit/credit card transactions, various currencies - all bundled together into simple, yet sophisticated account features, Bank of Georgia's VISA Infinite is branded as the OneCard that addresses all individual banking needs. Among the most favourite features praised by the Clients is the automatic identification of currency charged, so if you make your purchase in EUR, it will automatically detect if there's an amount in your EUR account and only charge other currencies in case there's no EUR, etc. No need to link any specific currency, the card has access to all four USD/EUR/GBP/GEL at any time. Our Clients have found it indeed very convenient to instruct their Private Bankers to convert funds in advance into the relevant / needed currency thus benefiting from preferential foreign currency exchange rate(s). Still another feature is access to cash on current account free of any charge anywhere worldwide.

Exceptions are the ATMs/machines where some ATM owners/banks are charging an extra commission – such ATMs usually have a notification window appearing prior to withdrawal informing you of the commission that they will charge on top of the issuer bank's fee. There's no fee charged by Bank of Georgia.

Service is truly personal

Dedicated Private Banker

Banking is very personal and as soon as the accounts are set, services and investments/products are selected, we introduce the client to a dedicated Private Banker who remains the only point of contact the client will need at the bank - addressing all banking needs.
